Developed in 1986 to host the 1988 Olympic Winter Games, the Canmore Nordic Centre Provincial Park is one of the few remaining operational Olympic Nordic skiing areas in the world. Valuable from Always Access, Canmore, Canada, and the world centre to the Canmore Nordic Centre to enjoy extensive recreational ski trails, participate in our spectacular of winter events.

More than 25 kilometers of groomed machine-made and natural snow trails grace the base of Mount Rundle in Canmore, Alberta. Most trails are suitable for both classic and skate technique. A network of meadows, located at the wilds of the trail system, is easily accessible for all levels of experience and offers spectacular views of the Rocky Mountains.

Our facility offers a 37-kilometer illuminated loop on machine made trails on the recreational area. More than 20 kilometers of trails are supported by machine made snow capabilities, including four 800-meter chutes. Machine made snow allows skiers after dark to the ski surface and more consistent conditions year round.

The Canmore Nordic Centre offers early season skiing in October due to a unique storage initiative in which snow is stored from the previous season.

Winter Trail Use
When using the trails (2017/18), please check for signage to help guide you in the appropriate manner. If you are unsure of trail conditions, please call the Canmore Nordic Centre at 1.800.427.3582 or www.AlbertaParks.ca.

A winter trailhead for recreational skiing is located north of the Daylodge. This trailhead is located to the left of the front counter. Trail signs are located at each major junction.

Select trails based on your ability and the degree of difficulty shown on map.

All trails are 2-way. Keep to the right in double track trails and pass on the left in single track trails. Obey posted directions for your safety. Please use the Cross Country Responsibility Code.

Notify the Nordic Centre staff of any trail hazards you encounter.

Signs are not permitted on groomed trails in the winter.

Preventing Conflict With Wildlife
Watch for signs that wildlife are in the area (tracks, scat, scrapes or covered kills)

Carry bear spray – this can be used for protection in the event of an encounter

Carry a cell phone to call for help in the event of a hazard.

Watch for signs that wildlife are in the area (tracks, scat, scrapes or covered kills)
