**Hiking Safety**

**Before You Hike**

- Plan Ahead!
- Research your route and check the weather forecast. Ensure you have adequate information to assist with route-finding such as maps, quickbooks or GPS files of your routes.
- Make a trip plan and let a friend or family member know where you are going and when you plan to return.
- Ensure that you carry a safety communication device such as an emergency personal locator device or a cellular phone. Note that cellular service is limited in many areas of the mountains.
- Pack appropriate equipment for your outing. Some items to consider include proper footwear, extra layers of clothing including a hat or toque, protection from the sun, wind and insects, a flashlight or headlamp and adequate food and water.
- Carry bear spray year round and know how to use it!

**While You Hike**

- Stay on established trails and avoid trail braiding.
- Do NOT pick or collect wildflowers or other vegetation; take a photograph instead.
- Do not litter. This includes cigarette butts, seed shells and tissue.
- Occasional shouting will warn wildlife that you are in the area.
- This is especially important near noisy creeks and in dense forest.
- Shouts are more effective than a bell, whistle or horn.
