

# Just the Facts... on Provincial Parks

There's a lot of misinformation circulating about provincial parks.

## Here are the facts!

- Parks are not being sold.
- Park lands are not being closed to the public.
- Government wants to increase partnerships with municipalities, Indigenous communities and non-profits. Already, we've built agreements over the years with partners in 121 provincial parks and recreation areas to manage facilities, campgrounds, concessions and trail maintenance.
- Sites that don't secure partnerships will still be accessible to the public for responsible recreation and enjoyment – as they are now.
- Government is committed to protecting sensitive areas on all provincial Crown land.
